

## Vent Bag Chicken Choker

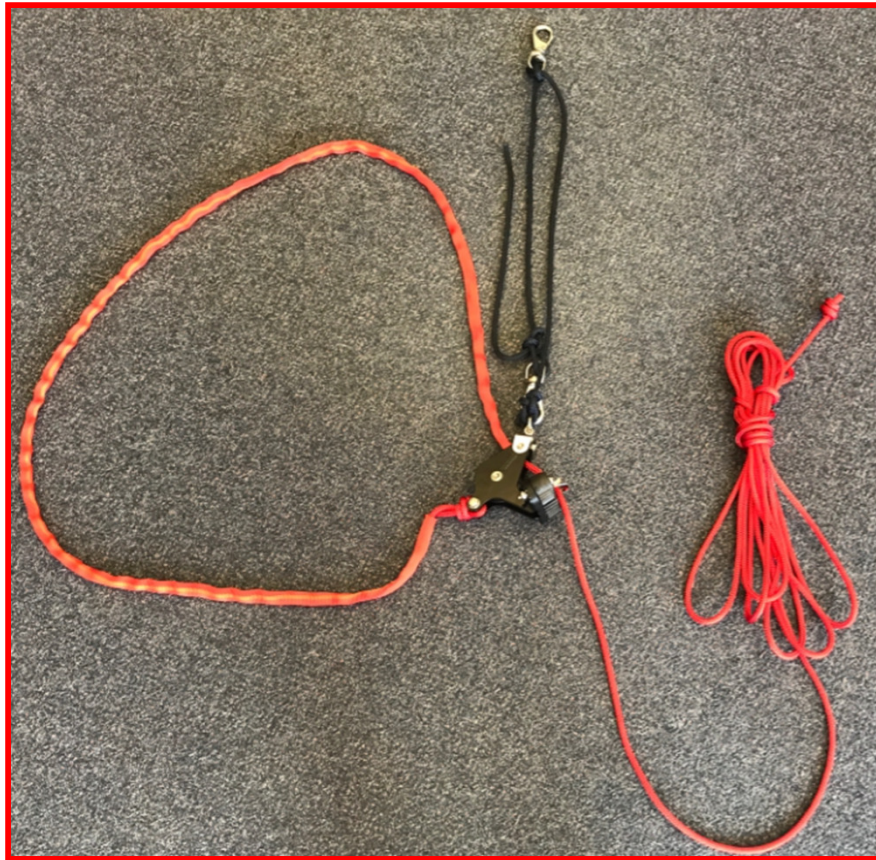

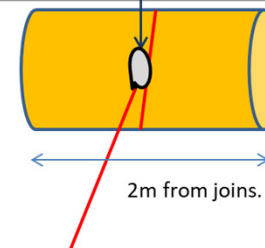

Mine Tech Australia has developed the Chicken Choker to assist workers to safely constrict vent flow into unmanned headings from the floor.

Made from durable and rated materials the Choker is designed to slip easily when restricting a pressurised bag and not to cause wear to the bag exterior.

Easy to install, adjust and release with a flick of the wrist, the Choker is the safe and cost effective way to maximise airflow and minimise heat build up within multi heading levels.

Clips to the mesh or DYNABOLT Pad Eye with cleat at mid bag.

Rated cleat designed to lock and release from the ground.

### Specifications:

- 8mm FSE ROBLINER Orion 500 Polyester MBS = 1.4T
- 316 SS Double Action Clips MBS= 0.25T
- Becket, Block & Cleat MBS = 1.6T
- Non Slip Wear liner = Unrated & non load bearing.
- Can be applied to any bag diameter .
